

TOWNSHIP OF NIPIGON

MEMORANDUM TO BIDDERS – ADDENDUM NO. 1

TO: RFP-2025-13 Bidders

FROM: Public Works Superintendent

SUBJECT: Addendum No. 1 (Clarification – Inclusion of Drainage and Culvert Inspections in Roads Needs Assessment)

DATE: October 8, 2025

The Township of Nipigon wishes to advise all proponents of the following clarification to the Roads Needs Assessment Request for Proposals (RFP):

The scope of the work for the Roads Needs Assessment has been expanded to include drainage and culvert inspections. This change is being made to ensure that surface drainage features and cross-culvert infrastructure that directly affect roadway performance and condition are assessed as part of the overall road network evaluation.

Accordingly, bidders are to include in their proposals:

- Inspection and condition assessment of roadside ditches and cross-culverts associated with the municipal road network
- Identification of drainage deficiencies impacting road condition or longevity; and
- Recommendations for maintenance, rehabilitation, or replacement priorities related to these drainage assets.

All other terms and conditions of the RFP remain unchanged.

Thank you for your interest and participation in RFP-2025-13-Roads Needs Assessment. If you have any questions or require further clarification, please reach out to the undersigned.

Yours very truly,

Taylor Haskell, C. Tech
Public Works Superintendent
